

7 Innovative Solutions in Local Health IT

LHIT Lightning Rounds

About Us

NACCHO launched a new Community of Practice (CoP) for Local Health IT staff, bringing together local health IT departments from across the country to share tips and best practices.

If you are interested in topics such as cybersecurity, interoperability, telehealth, hyperconvergence, website redesigns, accessibility, and more, this may be a good fit for you.

The CoP convenes through regular conference calls and webinars.

Local Health IT Virtual Conference

- Taking place September 25 from 12 – 5pm ET
- \$99 for members / \$199 for non-members
- Share replicable solutions for local health IT

GTT

The sponsor for this session is GTT Communications.

About GTT

- GTT is redefining global communications to serve a cloud-based future, connecting people across organizations around the world and to every application in the cloud.
- Our clients benefit from an outstanding service experience built on our core values of simplicity, speed and agility. A Fortune Future 50 company, GTT owns and operates a global Tier 1 internet network and provides a comprehensive suite of cloud networking services to any location in the world. www.gtt.net

**COBB & DOUGLAS
PUBLIC HEALTH**
Healthier lives. Healthier community.

Cobb & Douglas Public Health

Interactive Technology Project
Gurleen Roberts, DrPH, MPH

Background

Cobb & Douglas Public Health

- 2-County district in Northwest Atlanta
- Population of 899,636 combined (OASIS, 2017)

Cobb – 755,754

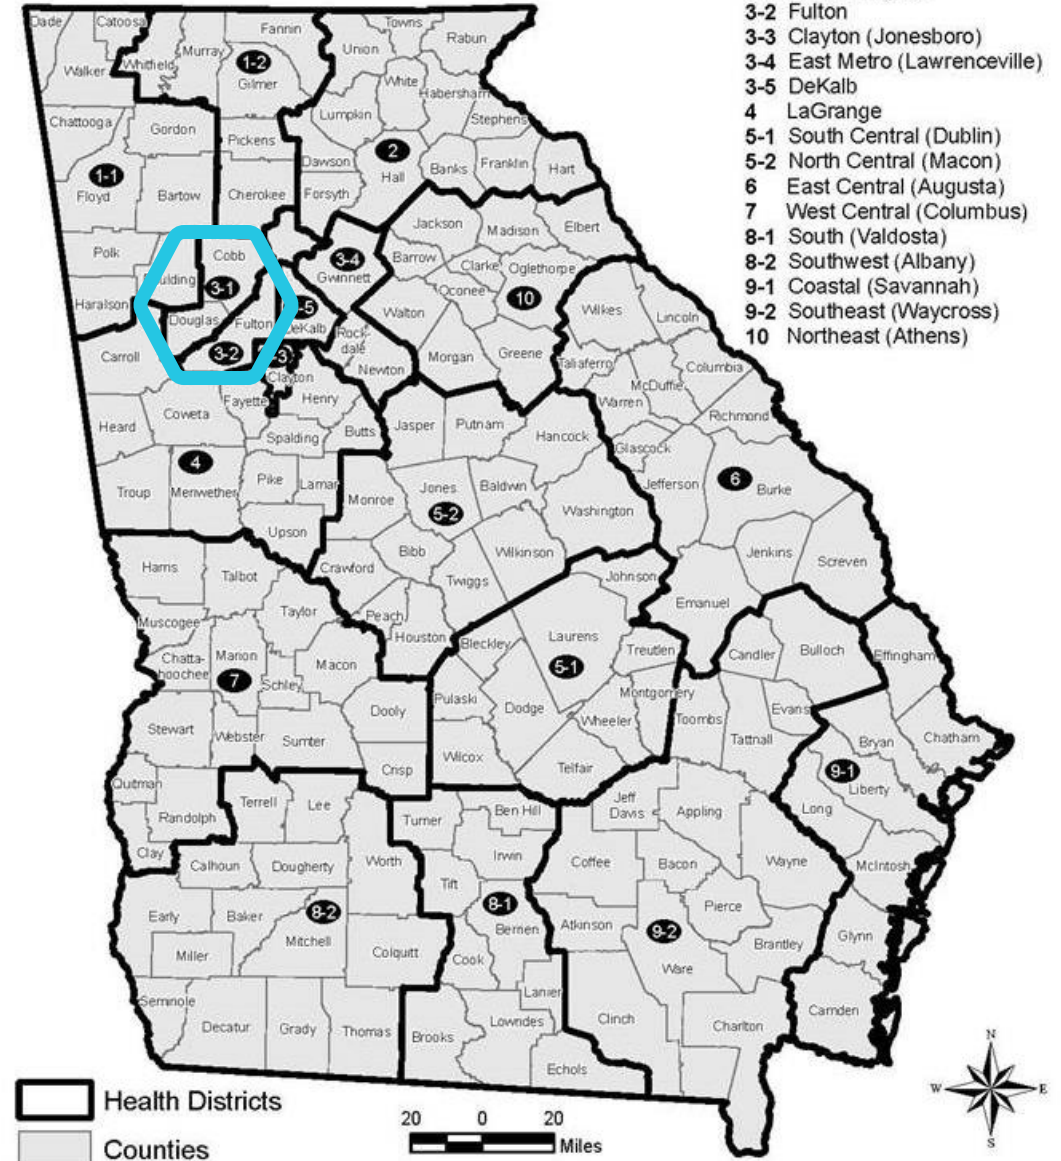

Douglas – 143,882

360 staff in 6 locations

- Regional points of interest:
 - SunTrust Park - Atlanta Braves stadium
 - Dobbins Air Reserve Base
- Accredited in 2015

GEORGIA Public Health Districts

Cobb County Safety Village

Multi-Sector Collaboration

Objectives

1. Increase educational opportunities and knowledge related to prevention of unintentional injury
2. Increase long-term retention of safety messages
3. Increase efficiency in delivering these messages

Philosophy

- Tell me and I will forget;
- Show me and I may remember;
- Involve me and I will learn for a lifetime.

Games

Germ Smash Game

Set on a playground, this game helps kids learn about germs, where they are located and how to prevent illnesses.

Germ Invader Game

In the style of an old-fashioned arcade game, this module teaches kids the benefits of vaccinations, proper diet and exercise in keeping the body healthy.

Games

Hand Washing Game

Using sinks and soap, this game teaches kids how to properly wash their hands to prevent the spread of germs and disease.

Emergency Preparedness Game

Set in a home, this game teaches kids how to prepare an emergency kit in the event of inclement weather and power outages.

Opioids: Prescription Drug & Heroin Crisis

Tri-County Health Department

Prescription drug misuse and abuse is a serious problem both nationally and here in Colorado. Each year, hundreds of our fellow Coloradans die from opioid painkiller overdose. Such deaths are now more common than alcohol-related traffic fatalities. The Centers for Disease Control and Prevention (CDC) call prescription drug overdose deaths one of the four most serious epidemics facing the nation and the President has declared the opioid crisis as nation emergency. Enough opioid painkillers are dispensed by pharmacies in the United States to supply each and every American citizen with enough painkilling pills to take one every four hours, around the clock, for a month.

Data and Resource Web Maps

The webmaps below visualize data around opioid and heroin overdoses from 2012-2017 and resources available throughout the community.

Speaker: Alyson Shupe

Tri-County Health Department

Using GIS to Address the Opioid Crisis

Call

- County Commissioners and other stakeholders wanted information
- Partners wanted a "one stop shop" for data
- Staff wanted a place to grab data for presentations and responses to inquiries (media, funders, etc.)
- Everyone wants data at the smallest geography possible

Response

- Created a data website using GIS and Tableau tools
- Website contains
 - Interactive maps for opioid and heroin deaths, drug take-back locations, naloxone retailers, SUD treatment facilities, mental health facilities
 - Links to key Coalitions
 - "What can we do right now" section

Drug Treatment Facilities | Metro Denver | 2017

Drug Treatment Facilities

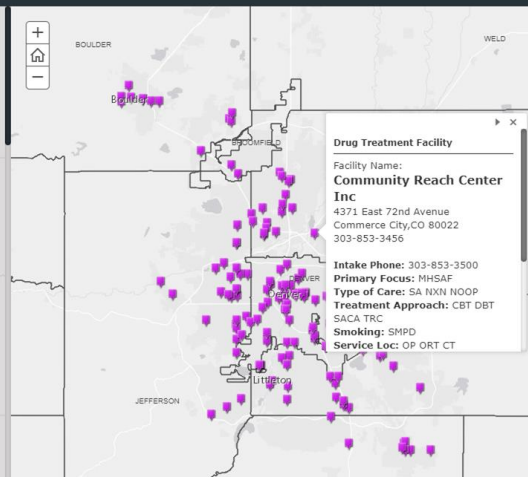

The following data was compiled for the Metro Denver region and geocoded by Tri-County Health Department from the National Directory of Drug and Alcohol Abuse Treatment Facilities - 2016 is a listing of Federal, State, and local government facilities and private facilities that provide substance abuse treatment services. The information about each facility that appears in this Directory was provided by that facility in response to the 2015 N-SSATS. N-SSATS is conducted annually by the Substance Abuse and Mental Health Services Administration (SAMHSA).

Click on any facility in the map to get more information about the facility and the services they provide. The following codes are those found in the facility pop-up

Primary Focus
GHF General Health Services
MHF Mental Health Treatment Services
MHSAF Mix of Mental Health and Substance Abuse
SAF Substance Abuse Treatment Services

HANDI - Using a Mobile App for Mass Intervention Data Collection

Judith Shlay, MD, MSPH

HANDI

Hand-held Automated Notification for Drugs and Immunizations

A mobile data collection application developed for mass immunization and prophylaxis events and routine clinic operations

Key features include the ability to:

- Rapidly collect demographic information through scanning technology
- Facilitate intervention eligibility and contraindication assessment
- Capture standardized patient data
- Operate in a variety of network environments
- Securely transfer data to immunization registries and data repositories using HL7 standards

Specifications:

- iOS mobile app
- Web-based administration tool (HANDIMan)
- Server-based database
- Utilizes barcode/magnetic stripe scanning technology through use of “sled”

HANDI in the Field

HANDI is flexible and customizable to meet a wide range of data collection use cases and requirements

- Denver Health Employee Influenza Campaign*, Fall 2012-2018 (2018 n=7,000 employee vaccinations)
 - Accommodates employee locations and schedules
 - Vaccination times averaged 1 minute or less
 - Employee vaccination status available in real time
 - Paperless system
- Tdap vaccination during childcare worker outreach and community health fairs
- Mini-Sentinel Medical Countermeasure project
- Point of Dispensing (POD) exercises
- MI Clinic (HANDI's platform, developed by Countermind™)
 - Guam Department of Health and Social Services, used for routine immunization
 - Denver Health Healthcare Worker Monitoring Application
 - Organ Donor Registration, used by 15 states

*Published in the *Journal of the American Medical Informatics Association*, Volume 25, Issue 4, April 2018, Pages 435-439, <https://doi.org/10.1093/jamia/ocx136>

HANDI – Lessons Learned and Future Enhancements

HANDI users report that data entry is easy, straightforward, intuitive, and fast.

Lessons Learned:

- Importance of involving partners and establishing relationships and roles early in the project
- Complexity of mobile device management and security
- Importance of a good relationship with the software vendor
- Regular and consistent usage increases user comfort level

Future Enhancements:

- Data linkage and integration with EHRs
- Direct transfer from device to data repository (already possible with Envision's immunization registry product)
- Streamline hardware
 - Use of device camera to replace expensive scanner
 - HANDI server installation in secure cloud

Salt Lake County

Partnership in responsible
electronic waste

Speaker: Gary Edwards,
Executive Director

Salt Lake County

The goals continued with partnerships via Samsung and other manufacturers.

Since 2012, the Salt Lake County Health Department has recycled over 10 million pounds of electronic waste, while saving the SLCoHD \$1.8 million dollars.

Continued Successes

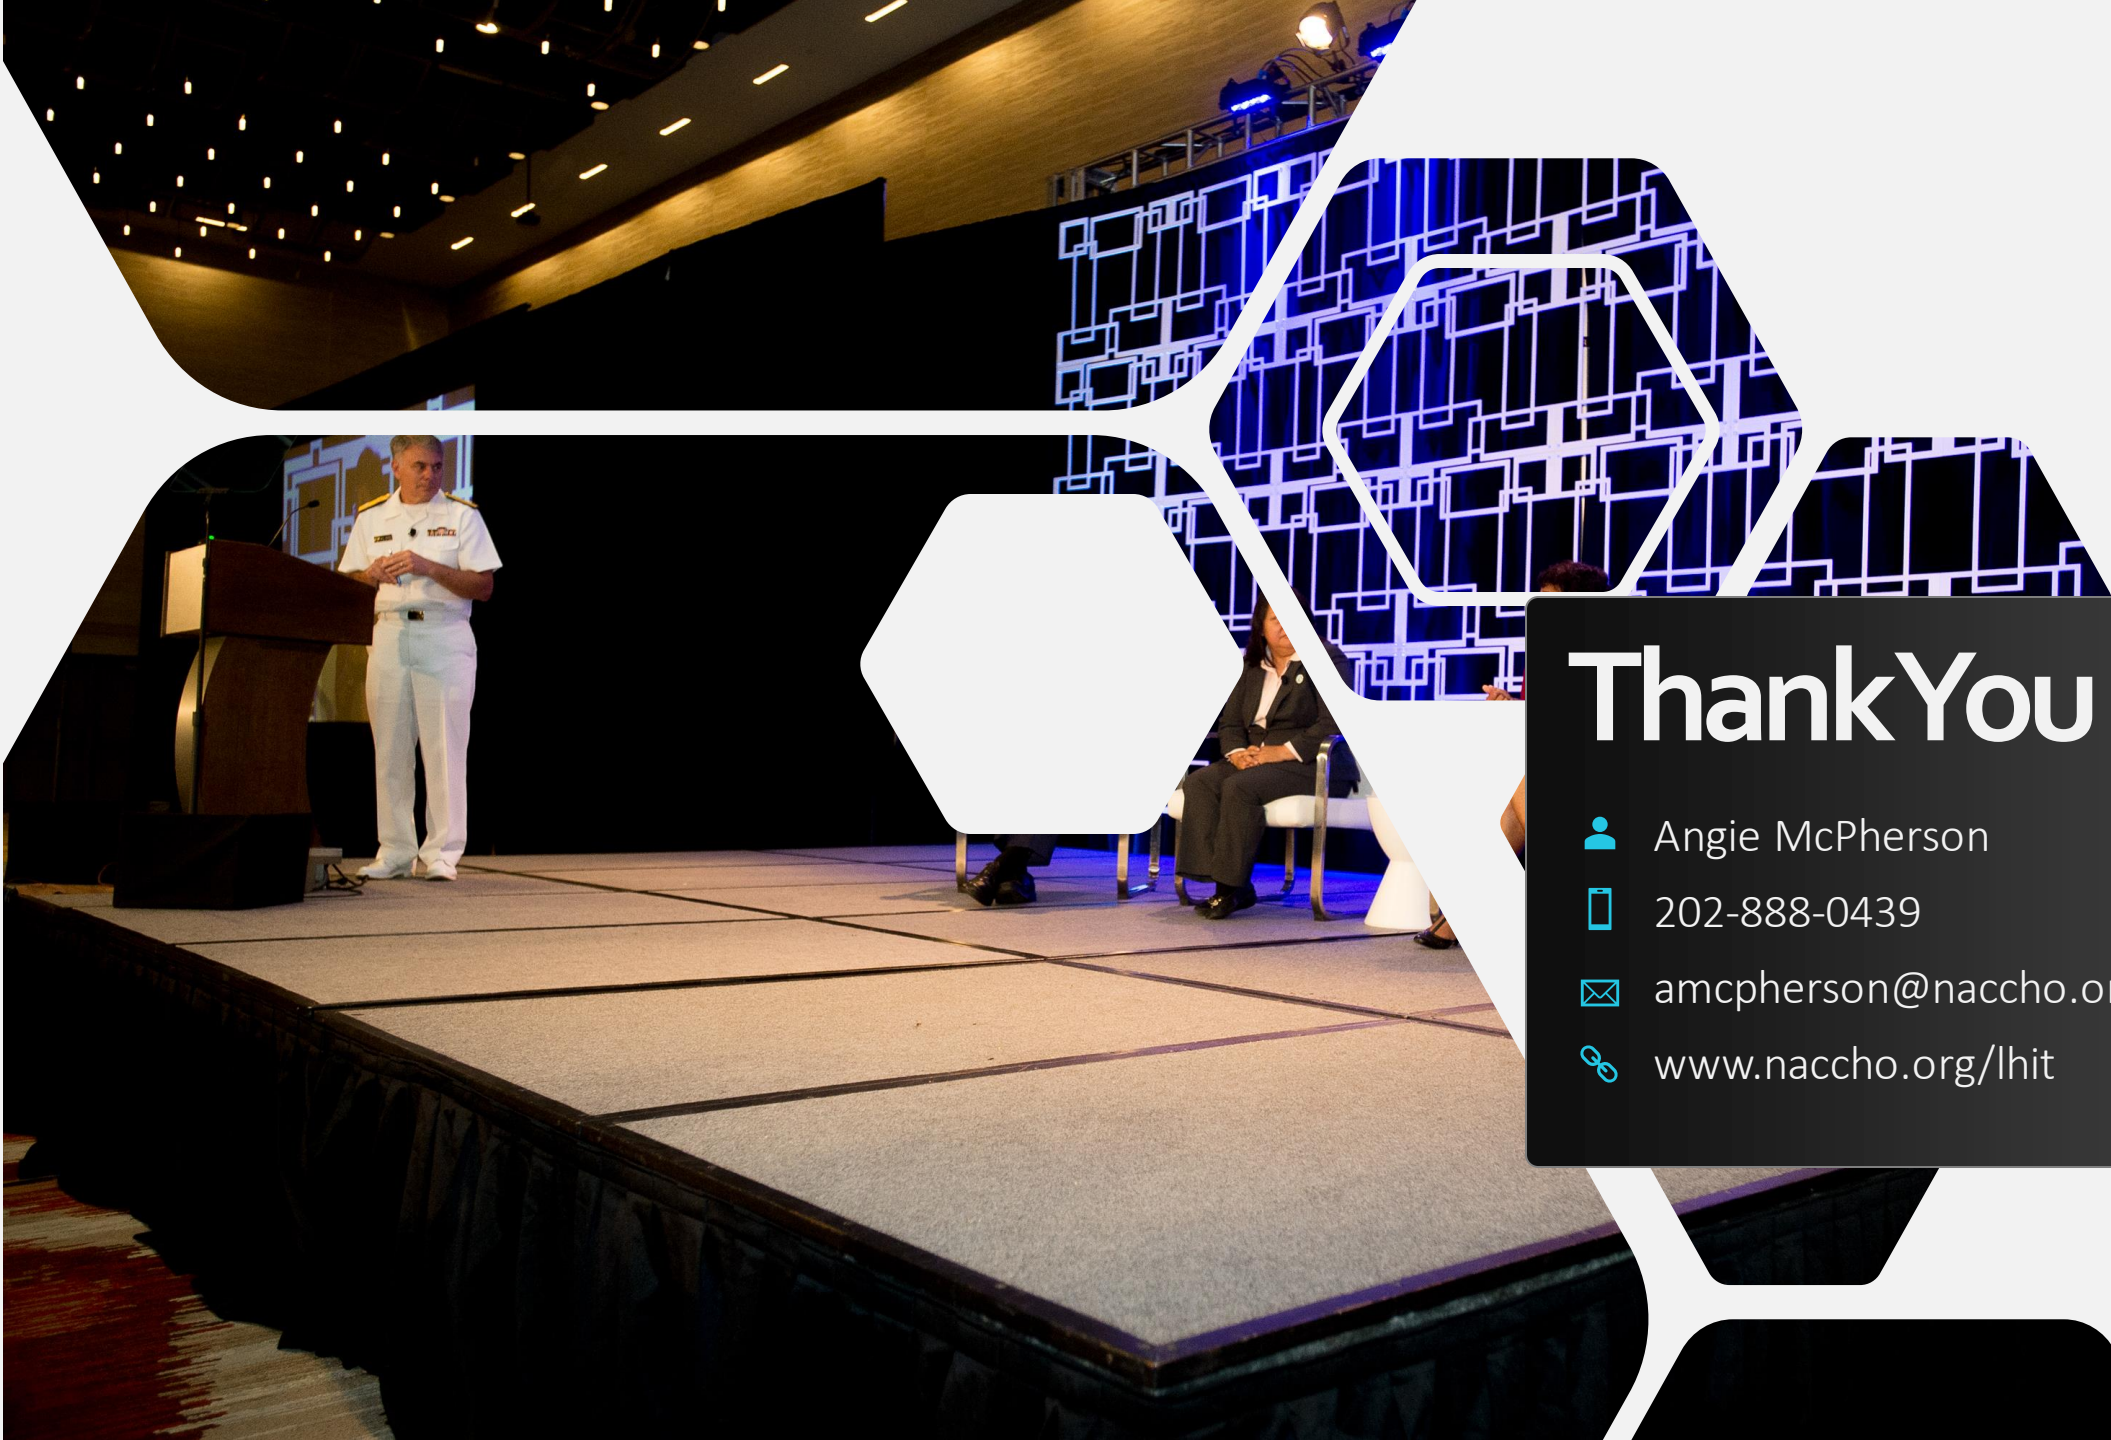

- Samsung has continued to support Salt Lake County Health Department. Other partners such as MRM, a manufacturer recycling consortium has also contributed a small amount of funding.
- Although County locations for diverting ewaste have decreased, successful education the public has resulted in over 10 million pounds of electronic waste being recycled since 2010. For example, the SLCoHD has partnered with a local sanitation district to advertise the program on garbage trucks.
- Educating public partners in the cost of electronic recycling and the voluntary relationship with Samsung, has spurred action to propose ewaste legislation to local State Representatives. These public entities include nonprofits, landfills, and health departments.

Challenges

- Samsung recognized that they were the only manufacturer willing to sponsor Salt Lake County in its recycling efforts and decreased its support to the program.
- Due to the lack of private funding available other local entities have taken on more responsibilities in recycling electronic waste in Salt Lake County. For example cities providing for their own collection events or Salt Lake City's Call to Haul Program.
- Unfortunately recyclers in the State of Utah have dropped more stringent recycling standards that Samsung requires. This lead the SLCoHD to ship electronic waste out of state which translates to a great amount of extra labor time and costs for the SLCoHD HHW Program.

Thank You
