

Adaptive Leadership

Foundations of Adaptive Leadership

Deya Greer, Lead Analyst, Workforce & Leadership Development

Mona Poblete, Program Analyst, Public Health Infrastructure and Systems

Using the chat function, please share one of the values you bring to your work in COVID health disparities and health equity work.

Adaptive Leadership Training Objectives

1. Explain the **foundations of Adaptive Leadership** in order to create a **new understanding of leadership**.
2. **Contrast technical and adaptive elements of the leadership challenges** before them so that they can more effectively deploy themselves and their resources to enable change.
3. Apply **understanding of the stakeholders** involved in leadership challenges by exploring their **values, loyalties and losses**.
4. Explore **Adaptive Leadership** tools to encourage **adaptive action**.

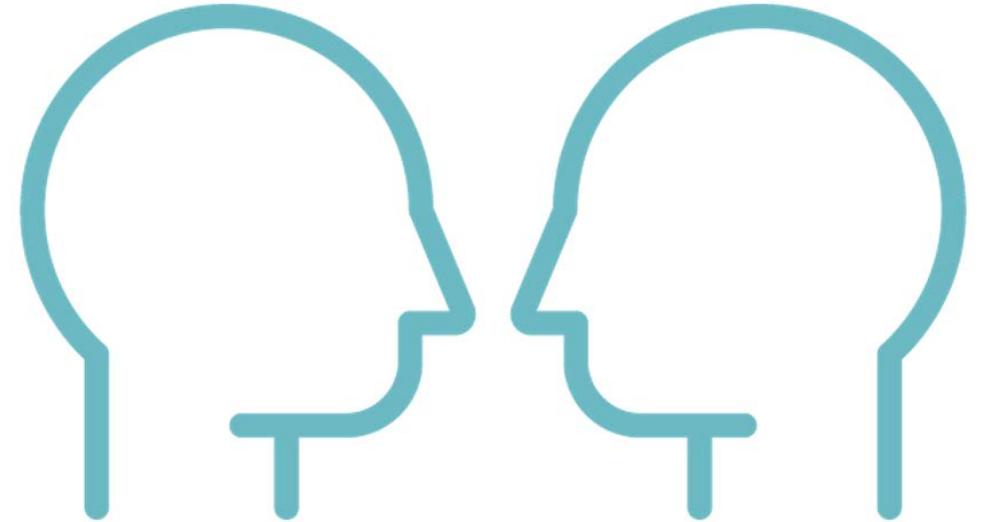

Adaptive Leadership Training Agenda

- **Introduction to Adaptive Leadership** (didactic presentation)
- **Technical vs Adaptive** (didactic presentation and individual activity)
- **Stakeholder Analysis: Values, Loyalties, and Losses** (didactic presentation and breakout group activity)
- **Closing**

Expectations for Your Participation

- Be present and participate
- Be authentic and vulnerable
- Listen to understand
- Keep confidentiality

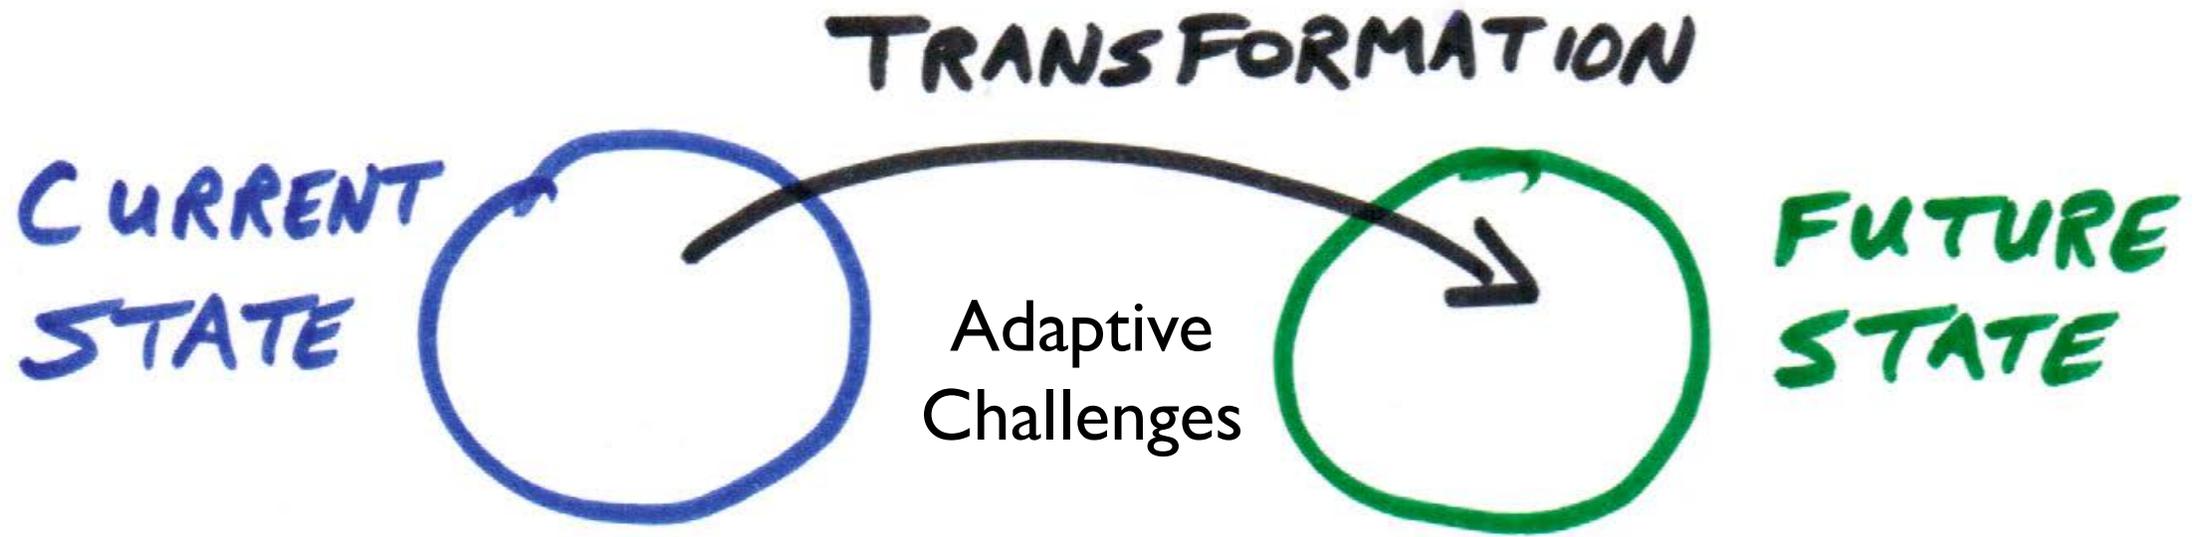

Foundations of Adaptive Leadership

Introducing the practice of leading adaptively

Adaptive Leadership is a practical leadership framework that helps individuals and organizations adapt and thrive in challenging environments.

4 Tenets of Adaptive Leaders

Emotional Intelligence

- Self-Awareness
- Self Management
- Social Awareness
- Relationship Management

Organizational Justice

- Decision Fairness
- Information Sharing
- Outcome Concern

Character

- Integrity
- Credibility
- Values Differences

Development

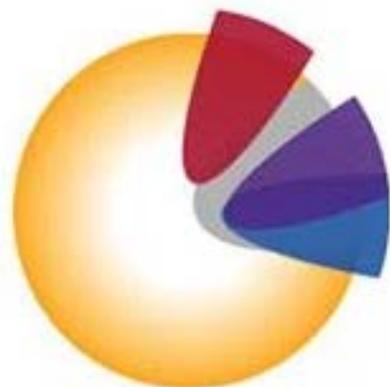

- Lifelong Learning
- Developing Others

Precious versus
Expendable

**Determining what
practices are core to
the future and what
are obstacles to the
future**

Experimentation
& Smart Risks

**Developing and
testing “next”
practices**

Disciplined
Assessment

**Integrating the “next”
practices**

**The difference between
human DNA and
chimpanzee DNA is
approximately 2%**

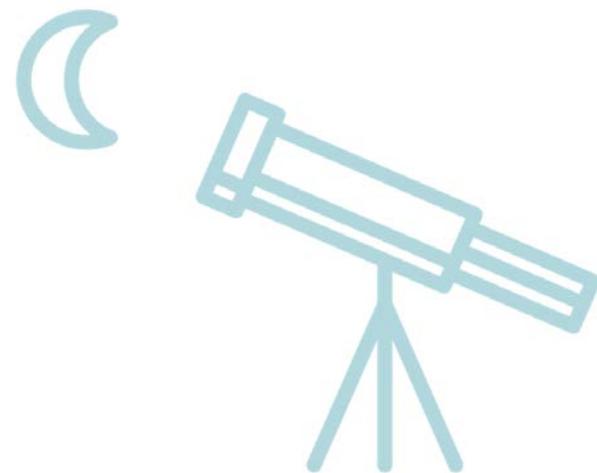

**What possibilities could
you create by changing
2% of your
organization's DNA?**

What is the Nature of the Work?

Technical vs. Adaptive

“Leadership would be a safe undertaking if your organizations and communities only faced problems for which they already knew the solutions.”

Ronald Heifetz

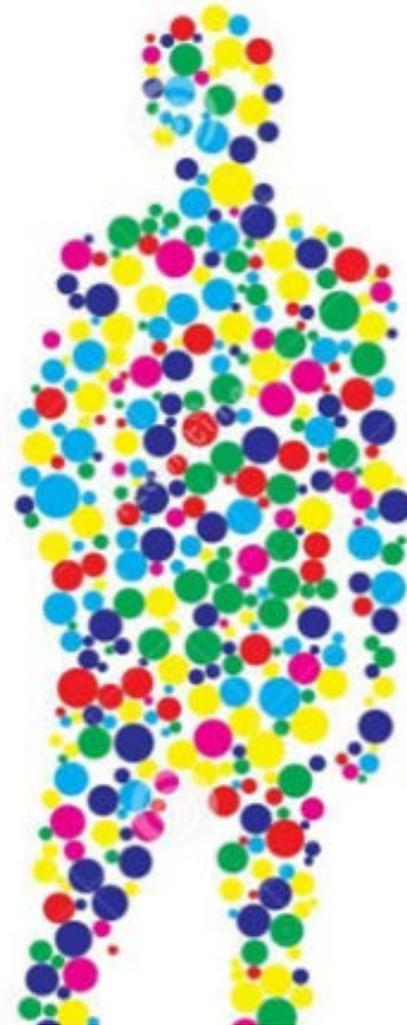

Problems Come Bundled

Type	Problem Definition	Solution Definition	Locus of Work
I - Technical	Clear	Clear	Authority Experts
II - Technical and Adaptive	Clear	Unclear; Requires learning	Authority Experts Stakeholders
III - Adaptive	Unclear; Requires learning	Unclear; Requires learning	Stakeholders Limited expertise

Compare/Contrast

Technical	Adaptive
Build a new office space	Build an organizational culture
Create a strategic plan	Instill in others a sense of ownership for the strategic plan
Collect and analyze quantitative data to identify health issues	Address health inequities highlighted in data analysis
Develop a community health improvement plan (CHIP)	Collaborate with community partners to implement CHIP

Technical vs Adaptive Work

Technical Change

Adaptive Change

Adaptive Challenges Characteristics

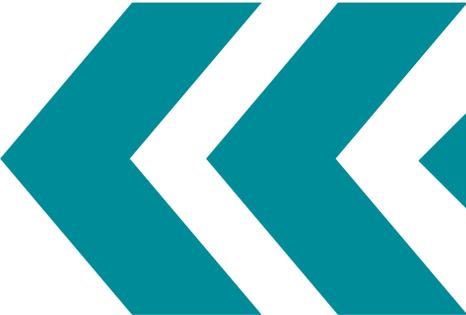

- Problem is difficult to identify
- Problem is easy to deny
- Progress requires loss and learning
- Progress requires constant experimentation
- Solution requires multiple changes across many boundaries
- Solution requires working with people
- Resistance is encountered
- Work on problem can be risky

CHALLENGES

Adaptive vs Technical

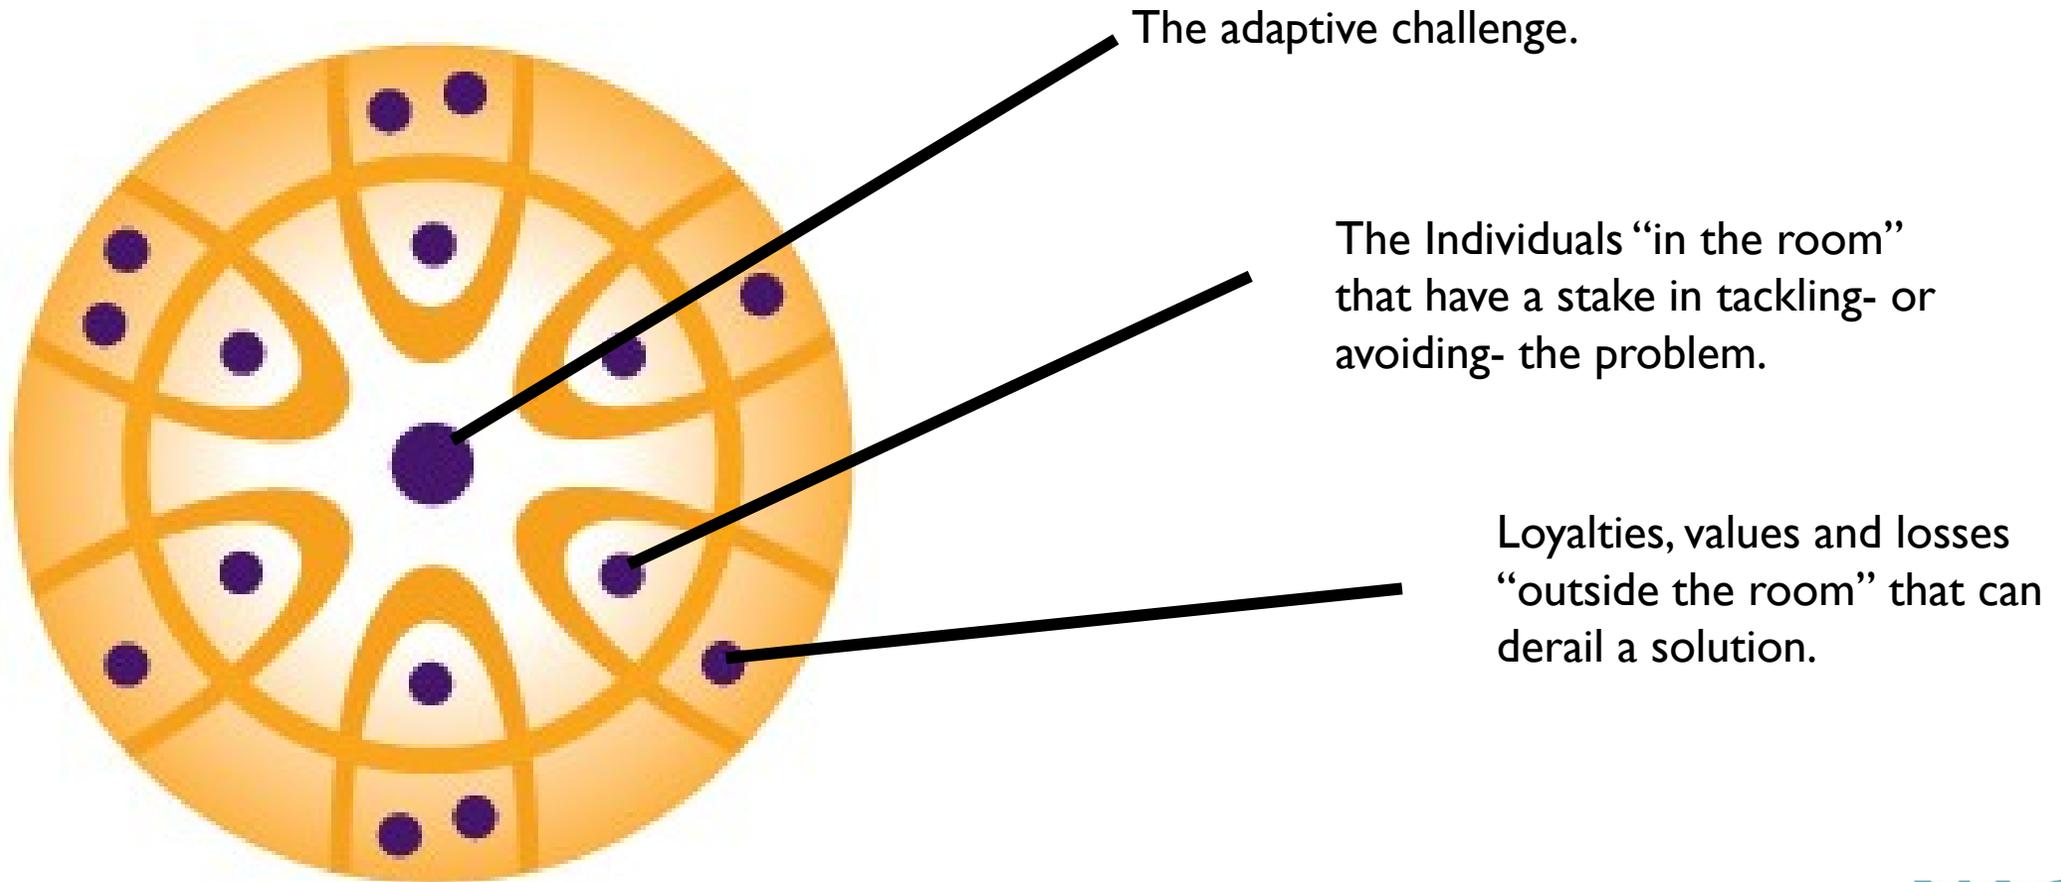

Individual Activity

Think about the most pressing challenge you are facing in your COVID Health Disparities work and use the Technical vs Adaptive worksheet to identify the technical and adaptive components.

Whose Work Is It?

Stakeholder Values, Loyalties, and Losses

Whose Work Is It?

The adaptive challenge.

The Individuals “in the room” that have a stake in tackling- or avoiding- the problem.

Loyalties, values and losses “outside the room” that can derail a solution.

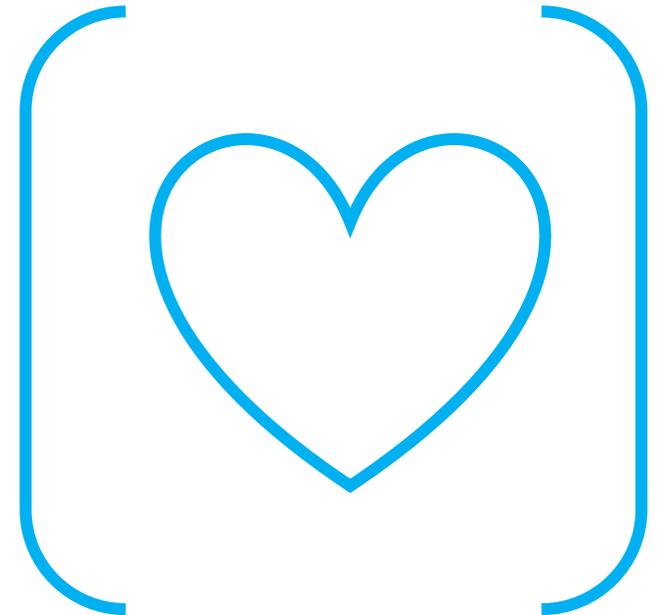

Stakeholder Values

- Behavior is motivated by values
- Decision making is informed by values
- Observation of behaviors can illuminate values

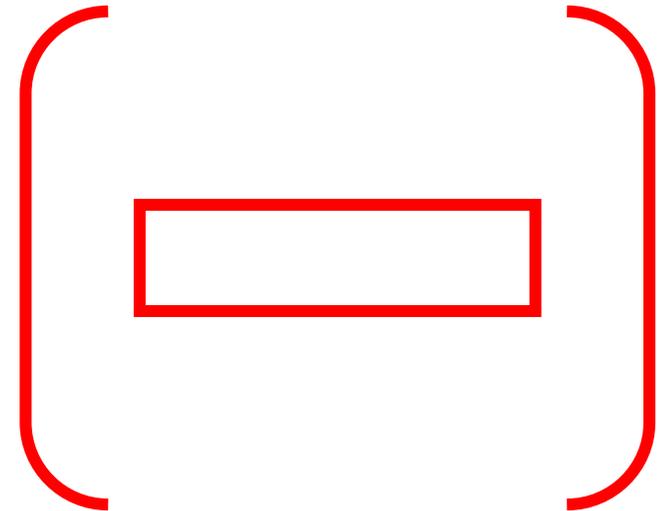

Stakeholder Loyalties

- People and organizations who your stakeholders are working with and for
- Pressure exists to represent their constituency
- Loyalties can pull people towards or away from collaboration

Stakeholder Losses

- Resistance to collaboration comes from perceived or actual loss
- Solutions to adaptive challenges always involve loss
- Identification of what is most important to you and stakeholders can help mitigate unsustainable losses

Breakout Activity

Stakeholder Values, Loyalties, and Losses

In your groups, help each other to think through the values, loyalties, and losses of yourself and one of your stakeholders in your adaptive challenge using the Values, Loyalties, and Losses section of the worksheet.

Using the chat function, please share how you could use the Values, Loyalties, and Losses mapping in your COVID health disparities and health equity work.

Thank you!
